BY-LAW, 1906, AMENDMENT BY-LAW,
1909.

A By-Law to Amend the "Plumbers and Plumbing
Regulation By-Law, 1906."

THE Municipal Council of the Corporation of
the City of New Westminster, enacts as
follows:—

1. Section 19 of the "Plumbers and Plumbing
Regulation By-law, 1906," is hereby repealed and
the following substituted therefor:

"When the roughing-in work of any plumbing or
house drainage has been completed, and before any
such work has been covered, or in any way con-
cealed from view, the same must be subjected to
either of the following tests: by plugging up all
openings, and filling with water to the highest
point, or by a pressure of air of not less than fifteen
(15) lbs. per square inch. When the plumber
doing said work has made his test, and found every-
thing perfectly tight, he shall notify the Inspector
(in writing) that such work is ready for his inspec-
tion. Such tests to include all soil, waste and
heat pipes, brass ferrules, and soldering nipples in
connection with the work. When such work is
completed, and all fixtures set, the Inspector must
be notified that the work is ready for final inspec-
tion, and may in his discretion require a final test
of smoke or peppermint, and no plumbing work
shall be used until this inspection has been made,

and certificates of approval have been issued to the
plumbing contractor, owner or agent:

"All sewer connections outside of building and
below the surface of the ground shall be inspected
by the Inspector before being covered, and in case
where the public safety might be endangered the
same shall be covered with the temporary covering
until the same is so inspected. No vitrified sewer
connection shall be run within five feet of the
building."

2. Section 29 of the said By-law is hereby re-
pealed, and the following substituted therefor:—

"Pipes on extension roofs, when within fifteen
(15) feet of an opening, shall be carried along the
roof to the main building and up and undiminished
in size to ten (10) inches above the main roof, and
three (3) feet above all openings; there shall be
no cowells, ventilators or return bends on the end
of pipe above the roof. All side branches of soil or
waste pipe must extend full size through the roof,
and must extend on a continuous straight line:

"Direct or converging soil pipes shall be and in-
crease in size as follows: When carrying the dis-
charge of not more than fourteen (14) water
closets, or the equivalent, four (4) inches in diam-
eter; from fifteen (15) up to seventy-five (75),
six (6) inches in diameter. For the purpose of
this requirement, four (4) wash basins or sinks,
two (2) urinals, or two (2) slop sinks, two (2)
bath tubs, two (2) laundry tubs, two (2) sinks,
provided the same have waste pipes not to exceed
two (2) inches in diameter, shall be considered
equal to one water closet."

3. Section 30 of the said By-law is hereby re-
pealed, and the following substituted therefor:—

"No soil pipe shall be less than four (4) inches
in diameter. Waste pipes receiving the discharge
from eight fixtures shall not be less than three (3)
inches in diameter. Those receiving the discharge
of from three (3) to seven (7) fixtures shall not be
less than two (2) inches in diameter. Those
receiving from less than three (3) shall not be less
than one and one-half (1½) inches in diameter.
There shall be cleanouts put in sewer connection at
each change of direction of the same, and at the
foot of each vertical line of soil pipe. All clean-
outs to be put in with Ys and one-eighth (⅛)
bends, and shall be closed with brass screw covers,
and kept accessible when sewer connections are
laid beneath the floor."

4. Section 41 of the said By-law is hereby
amended by adding the following:—

"All ventilation pipes must have a fall back to
the stop, and in all cases before being connected to
main it must pass one (1) foot above the water
line of highest fixture."

5. The said By-law is further amended by add-
ing the following as section 52A:—

"Regulation for water services in all buildings.

"1. All water pipes when placed under ground
shall not be less than thirty (30) inches below the
surface of the ground, and all other pipes where
so situated as to be exposed to frost shall be prop-
erly protected by having a box placed around them
filled with sawdust:

"2. A stop and waste cock shall be placed where
the pipe enters the house, on the inside of base-
ment wall; this stop and waste to be thirty (30)
inches below the surface of the ground. A water
key shall be made fast to said stop and waste, and
extended up through the floor, with handle on same,
so that water can be shut off from inside the house.
It is not intended that this is necessary when the
basement of the house has been excavated to below
three (3) feet from top of ground, in which case it
will be necessary for to place the stop and waste
just inside of basement wall:

"3. All water pipes inside of building must have
a fall to the stop and waste. It will be necessary
for the plumber to see that no pockets are left in
the pipes, and if so, said pipes must have a drip-
cock put on so as to drain out all water from the
same; this is to apply to both hot and cold water
pipes. All pipes must be strapped whenever a
bend or branch is made in same:

"4. All water pipes when concealed must be
placed so that a board can be taken off and all
pipes exposed, said pipes to be run three (3)
inches apart, and the hot water underneath:

"5. All lawn taps shall have a separate stop and waste cock placed thirty (30) inches below the surface of the ground, also have a wooden box or six (6) inch drain pipe placed over same, with cover on same:

"6. All water closet supply pipes, where necessary in the opinion of the Plumbing Inspector, must have a drip-cock placed on same one and one-half (1½) inches from the bottom of tank:

"7. Cold water supply to range boilers must be from top of boiler. The supply pipe in all cases to have hole in same not more than six (6) inches from top of boiler."
